Item Name: FY 2022 Capital Development Plan (UArizona)

Action Item

Requested Action: The University of Arizona (UArizona) asks the board to approve its FY 2022 Capital Development Plan (CDP), which includes a request for a budget increase for the Center for Integrative Medicine project, as described in this executive summary.

Previous Board Action

• FY 2020 Capital Development Plan

November 2019

Prior Year Activity

- One (1) capital project totaling \$34,000,000 was substantially completed in the last 12 months.
- Six (6) capital projects, totaling \$370,000,000 began or were under construction activity in the last 12 months.
- Detail on completed and ongoing projects are listed in Exhibit 1.

Overview and Alignment with Enterprise and University Goals and Objectives

- UArizona's FY 2022 CDP includes one budget increase request for the Center for Integrative Medicine totaling \$3,000,000 for a revised project budget of \$23,000,000.
- UArizona has developed the CDP to align with its Strategic Plan and Campus Master Plan, and with the system enterprise strategic goals and objectives.
- The primary institutional priorities supported by the CDP include:

Academic Success: Facility investment and development are targeted toward student success, academic excellence, diversity, and accessibility as measured by our strategic plan goals for enrollment, retention, graduation rates, and degrees awarded.

Research & Development: University research greatly contributes to the quality of life and economic vitality of our state. Sponsored research expenditures include the purchase of local goods and services which help to create new companies and employment benefits. Research and development provide hands-on experience for students while attracting top research talent and giving the state a competitive advantage in core areas such as science, technology, and medicine. Facilities, research faculty, and sponsored grants are key to meeting the objectives of the ABOR 2025 Vision Plan.

Campus Operations and Infrastructure Priorities: To advance our academic success and research goals, our facilities and related infrastructure must be safe, reliable, and operational. Building and utility systems must be efficient to operate and maintain to reduce the burden on reduced operational funds. Spaces and systems must maximize functionality and performance while minimizing investments.

Life Safety & Code Compliance: Life safety is our highest priority in ensuring a safe, functional, and serviceable environment for students, faculty, staff, and visitors. This priority is established for new and existing facilities alike.

Community Service Opportunities: Engaging and serving Arizona communities are integral to the University's mission and land grant responsibilities. Our community outreach and service efforts are focused on the quality of life and economic prosperity in Arizona.

Construction Market Conditions: The current construction market is active with increasing labor shortages and accompanying price escalations for the foreseeable future. It is advisable to proceed with projects and lock-in prices to minimize additional escalation for the University.

Funding Sources & Financing Options: Project funding and financing are carefully considered on a project-by-project basis and take advantage of opportunities to minimize impacts to tuition. State appropriations, gift funding and indirect cost recovery are leveraged and maximized while fees, tuition and operational funding are carefully metered for highest yield. At all times the University's financial strength, standing and ratings are considered to ensure long term stability and success.

Capital Development Plan Projects

- The following project is being submitted for budget increase approval:
 - o Center for Integrative Medicine
- Additional detail on project costs, financing, and scope can be found in the tables in Exhibits 2 & 3, and the individual Project Justification Report is attached.

Fiscal Impact and Management

- UArizona's CDP includes one updated project, the Center for Integrative Medicine. This project will cost a total of \$23 million and will be financed using gift funds.
- There is no expected debt service for this project. The total operating and maintenance (O&M) cost is estimated to be \$203,400. UArizona plans to use Other Local Funds to pay the O&M cost.
- **Debt Ration Impact:** There is no impact to UArizona's debt ratio.

Committee Review and Recommendation

The Finance, Capital and Resources Committee reviewed this item at its May 27, 2021 meeting, and recommended forwarding the item to the full board for approval.

Statutory/Policy Requirements

- Pursuant to ABOR Policy 7-107, each university shall submit an annual CDP for the upcoming year in accordance with the calendar approved by the executive director of the board.
- CDPs are reviewed by the Finance, Capital and Resources Committee and approved by the board.
- Approval of the CDP allows universities to complete design, execute construction and financing agreements, and begin construction as outlined in policy.

Board of Regents Meeting June 9-11, 2021 Item #21 Page 4 of 14

2021 DEBT CAPACITY

PURPOSE

To demonstrate the University of Arizona's ability to finance additional capital investment through debt instruments and to fund the related debt service (principal and interest).

PROJECTED DEBT CAPACITY

The debt capacity report includes four projects from the Capital Development Plan (CDP): Applied Research Building, Grand Challenges Research Building, Chemistry Building Renovation, and Facilities Management Relocation and Consolidation Facility. With the financing of the projects listed, the projects highest debt ratio is 5.4 percent in FY 2024, relative to the ABOR policy and statutory debt limit of 8 percent. The University outstanding debt in that year is projected to be \$1.50 billion. The year with the highest debt service will be FY 2024 at \$114.7 million. The 5.4 percent ratio is within the range used by the bond rating firms to judge an institution's creditworthiness to service debt.

UArizona projects outstanding debt (issued) to decline from \$966.2 million in FY 2021 to \$539.6 million in FY 2029 as debt is retired. The planned debt includes financing of the projects listed in the paragraph above. Additional debt capacity represents debt that can be issued in any given year based on the statutory 8 percent debt ratio limit.

FUTURE PROJECTS

Projects listed are from the prior CDP and will be issued prior to the end of FY2021. These planned projects are included in the Debt Capacity assumptions. There are no additional debt financed projects in the current CDP.

	Project Budget		Amount Financed*		Financed**
Applied Research Building*	\$	101,000,000		\$	76,100,000
Grand Challenges Research Building*		99,000,000			75,800,000
Chemistry Building Renovation*		42,000,000			32,500,000
Facilities Management Facility		24,000,000			12,100,000
Total	\$	266,000,000		\$	196,500,000

* Includes funding from State Capital Appropriation HB2547

** Financed amount based on pre-pricing data available April 2021

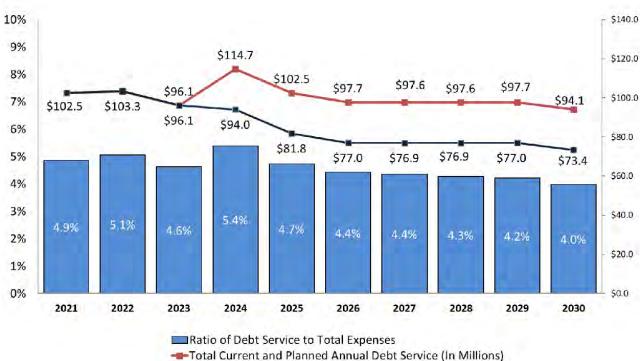

CREDIT RATINGS

UArizona's current credit rating is Aa2 (Moody's) and AA- (S&P). Positive rating factors include UArizona as the flagship and land-grant institution, as well as its important role in the provision of medical education for the State of Arizona. The university continues to have growing and diverse research programs and sizable sponsored research funding with diverse sources. Offsetting factors include weakened operating performance, thinning, but adequate, debt coverage, and high leverage service compared to Moody's median peers.

	Mo	ody's		d & Poor's &P)
Fiscal Year	<u>Rating</u>	Outlook	Rating	<u>Outlook</u>
2016	Aa2	Stable	AA-	Stable
2017	Aa2	Stable	AA-	Stable
2018	Aa2	Stable	AA-	Stable
2019	Aa2	Stable	AA-	Stable
2020	Aa2	Stable	AA-	Stable
2021	Aa2	Negative	AA-	Stable

RATIO OF DEBT SERVICE TO TOTAL EXPENSES

Annual debt service on System Revenue Bonds (SRBs) and Certificates of Participation (COPs) is projected to increase from \$111.4 million in FY 2021 to a maximum of \$114.7 million in FY 2024. The ratio of debt service to total expenses is projected to peak in FY 2024 at 5.4 percent relative to the 8 percent statutory limit. The peak planned debt ratio includes debt service for the projects listed on the previous page. The Stimulus Plan for Economic and Educational Development (SPEED) bonds are funded up to 80 percent by state lottery revenues, with the balance funded by the University. SPEED debt service is excluded from the statutory debt ratio. If SPEED debt were included, the debt ratio is projected to peak in FY 2024 at 6.6 percent. The maximum projected annual debt service including SPEED is \$140.4 million in FY 2024.

----Current Annual Debt Service (In Millions)

Arizona Board of Regents The University of Arizona FY 2022 Capital Development Plan (CDP) Project Justification Report

Center for Integrative Medicine

Previous Board Action

- Capital Improvement Plan FY 2021-2023
- Capital Development Plan FY 2020

September 2019 November 2019

Statutory/Policy Requirements

- Pursuant to ABOR Policy 7-102(B)(1), all capital projects with an estimated total project cost of \$10,000,000 or more, including information technology and third-party projects, shall be included in the Capital Development Plan.
- Pursuant to ABOR Policy 7-107(E)(4)(b), approval is required for any project cost increases.

Project Justification, Description, and Scope

- This new building for the Center for Integrative Medicine (CIM) will be located North East of the Highland Parking Garage at Mabel Street and Vine Avenue, on the campus of the University of Arizona, Tucson, Arizona. The Center for Integrative Medicine and its exterior spaces will house the following basic functions: clinical simulation, educational, culinary demonstrations, meditation, and administrative spaces. The Center will facilitate the fundamental goal of creating a physical environment that supports the evidence-based philosophy of integrative medicine while reflecting a distinctive life-enhancing environment that will attract the local community, national and international visitors.
- Locating the CIM on the campus of the University of Arizona and adjacent to the Health Sciences is critical to the Centers' vision, goals, and future growth.
- This project encompasses 29,400 Gross Square Feet (GSF), which includes 18,300 Net Assignable Square Feet (NASF). The project also includes development of

outdoor meditation garden space and leverages the existing adjacent green spaces to the west.

• The budget increase for this project is requested for several reasons. Recent construction materials cost increases have reduced the capacity of the previous budget to realize the vision of the Andrew Weil Center for Integrative Medicine that has been in design over the last two years. Also, the unique aspects of this facility design include a multi-building complex representing mind, body, and spirit to reflect the nature of the Center's philosophical approach to wellness, medicine, and personal health in all these areas, and comparable projects used to develop the original budget do not match the cost of the facility desired to fulfill the unique requirements of the Center. Additionally, after further evaluation of the site, it became apparent that additional parking spaces will need to be purchased to develop the project on the selected site.

Project Delivery Method and Process

- This project is being delivered through the Construction Manager at Risk (CM@Risk) method. This approach was selected for the project because it can save time and cost through fast-track project scheduling, provides contractor design input and coordination throughout the project, improves potentially adversarial project environments, and allows for the selection of the most qualified contractor leadership team for this project. Through peer-review of the CM@Risk's cost estimates at each phase, and low-bid subcontractor pricing for the actual construction work, this method also provides a high level of cost and quality control.
- The CM@Risk has been selected through the capital project selection committee process prescribed by the ABOR Procurement Code. A licensed contractor was included on the selection committee as required by ABOR policy. The design team has been selected through a similar ABOR process.

Project Status and Schedule

- Project is in the construction documentation phase.
- Project construction is scheduled to commence during summer of 2021 and will be completed during summer/fall of 2022.

Project Cost

- The newly revised total project budget is \$23 million, with a construction cost of \$16,775,000 million.
- The construction budget for this project was generated as part of a gift agreement. As the project progresses, peer reviews of the CM@Risk's estimates will be reconciled by the Project Team.

Fiscal Impact and Financing Plan

- The University plans to use \$23 million in gift funds for the Center for Integrative Medicine Building with a total project budget of \$23 million.
- The operations and maintenance (O&M) cost for the building is estimated to be \$203,400. Other local funds will be utilized to fund the O&M cost.

Debt Ratio Impact

• This project will have no impact on the University's debt ratios because no debt will be issued to finance this project.

Occupancy Plan

• This facility will provide new space for new and existing faculty and staff. It is anticipated that some of the existing space will be retained by Health Sciences when the CIM staff and faculty are relocated to their new building. The existing facilities will not be demolished and will be re-assigned by Health Sciences.

Capital Project Information Summary

University:The University of ArizonaProject Name:Center for Integrative Medicine

Project Description / Location:

This new building for the Center for Integrative Medicine (CIM) will be located North East of the Highland Parking Garage at Mabel Street and Vine Avenue, on the campus of The University of Arizona, Tucson, Arizona. The Center for Integrative Medicine and its exterior spaces will house the following basic functions: clinical simulation, educational, culinary demonstrations, meditation, and administrative spaces. The Center will facilitate the fundamental goal of creating a physical environment that supports the evidence-based philosophy of integrative medicine while reflecting a distinctive life-enhancing environment that will attract the local community, national and international visitors.

Locating the CIM on the campus of the University of Arizona and adjacent to the Health Sciences is critical to the Centers' vision, goals, and future growth.
