# **Compliance Risk Assessment**

January 10, 2022 Report Number FY20 20-01

### **Distribution:**

Audit Committee, Arizona Board of Regents Internal Audit Review Board Josè Luis Cruz Rivera, President

Brian Register, Chief of Staff
Bjorn Flugstad, Chief Financial Officer, Vice President, University Finance and Business Services
Josh Mackey, Chief Human Resources Officer
Michelle Parker, General Counsel
Jason Wilder, Vice President, Research
Steve Burrell, Chief Information Officer, Vice President, Information Technology Services
Wendy Swartz, Associate Vice President and Comptroller
Becky McGaugh, Associate Vice President, Chief Procurement Officer and Risk Manager
Pam Heinonen, Associate Vice President, Human Resources Equity and Access Office
David Faguy, Associate Vice President, Research Compliance
Michael Zimmer, Director, ITS Information Security Services

This report is intended for the information and use of the Arizona Board of Regents, NAU administration, the Arizona Office of the Auditor General, and federal awarding agencies and subrecipients.

### **Summary**

Completing this Compliance Risk Assessment was approved in the Fiscal Year 2020 Internal Audit Plan by the Audit Committee of the Arizona Board of Regents (ABOR). This assessment supports all Northern Arizona University (NAU / University) strategic goals by assessing the existence of policy, procedure, processes, or other activities that support NAU's compliance with applicable key laws, rules, and regulations, which can impact achievement of one or more of NAU's strategic goals.

**Background:** Compliance risk can be defined as the challenges and opportunities resulting from an organization's tenacity in complying with applicable federal, state, and local laws, rules, and regulations. On the challenge side, compliance risk is the threat posed to an organization's financial, organizational, or reputational standing resulting from violation of such laws, rules, regulations, and related organizational codes of conduct or standards of practice. On the opportunity side, compliance risk represents the avoidance of such challenges in addition to the maintenance and / or increase in funding sources such as those supporting student financial aid and NAU research.

The importance of proactively maintaining an effective compliance program has never been more critical as a component of overall organizational governance. For the past decade or more, higher education has been experiencing an era of increasingly complex and evolving regulatory activity at the federal and state levels, that often changes notably from one US political administration to the next. During this same time, NAU has grown on many levels including student enrollment, financial commitments, and federally funded research activity. As such, both higher education in general, and NAU specifically, have had to adapt to ever-growing demands for accountability from policy makers, regulators, and the public. On top of this existing complexity, NAU must now address the regulatory impact of the recent health pandemic in terms of required compliance with the CARES/HEERF Act and related legislation.

In the words of Janice M. Abraham, president and CEO of United Educators Insurance and author of a new Association of Governing Boards (AGB) book, *Risk Management: An Accountability Guide for University and College Boards*, "Although not at the level of financial institutions and utilities, higher education faces a labyrinth of rules and regulations that must be followed. Noncompliance can lead to fines, liabilities, and/or reputational risk. Compliance requirements vary according to the size, complexity, and mission of the institution. However, all institutions must comply with a core set of employment, financial, safety, and environmental regulations." While Ms. Abraham does not reference research, federal granting agencies like the Department of Defense, National Institutes of Health (NIH), and National Science Foundation (NSF) place notable expectations on its grantee organizations and with NAU's growth in research over the past several years, the need for focused compliance efforts and supporting institutional processes and resources appears notable.

**Assessment Objective:** To create an inventory of key compliance requirements applicable to NAU and complete a related high-level gap assessment to determine if each requirement is supported by some evidence of being addressed. The nature of this high-level assessment is not to categorize or necessarily identify areas of higher compliance concern but to determine if there are gaps in NAU's compliance with the federal and state laws, rules, and regulations applicable to NAU.

**Scope:** The scope included key federal and Arizona State laws, rules, and regulations applicable to higher education institutions, and specifically determined to be applicable to NAU. Under Arizona State law, NAU is exempt from complying with local laws, rules, and regulations. Therefore, while

NAU does maintain a focus on being a productive and valuable local "citizen," such local laws, rules and regulations are excluded from the scope. The assessment also did not attempt to validate or suggest that actual compliance is or is not occurring; it focused on only identifying some acknowledgement of each related law, rule, and regulation within NAU's compliance and policy documentation.

**Methodology:** The following procedures were performed to accomplish the audit objective:

- Obtained a comprehensive list of laws, rules, and regulations deemed applicable to higher education institutions as compiled by the Higher Education Compliance Alliance (HECA).
- Updated the HECA list with additional laws, rules, and regulations that appeared applicable to NAU, using resources available from other professional associations (e.g., the Association of College and University Auditors), information gleaned from past audits, internet searches, and discussion with professional peers.
- Identified and updated the HECA list for applicable Arizona State Laws.
- Analyzed each identified law, rule, or regulation to determine applicability to NAU, including consultation with NAU General Counsel and applicable NAU compliance specialists.
- Through NAU web searches, policy library searches, electronic and in-person interviews, and review of related prior audit work, determined if NAU had some policy, procedure, practice, or other activity supporting efforts to comply with each applicable law, rule, or regulation.
- Obtained data from NAU's ABOR-approved list of academic and research university peers regarding the existence and structure of compliance oversight functions.

**Conclusion:** Overall, there are more than 250 federal (Exhibit A) and Arizona state (Exhibit B) laws, rules, and / or regulations that apply to NAU and, excluding the specific requirements of each, NAU appears to have some evidence of supporting compliance activities to address nearly all those laws, rules, and regulations. As noted in the Scope, this does not suggest that NAU is in strict compliance, but instead indicates that there was either a formal policy or procedure in place, some form or process supporting compliance, related information posted on an official NAU internet web page, or that a noted higher education regulatory reference was not specifically applicable to NAU.

NAU appears to have a compliant culture given the lack of significant compliance gaps identified in this high-level assessment, compliance activities are managed by an accountable individual in each department to which a given regulation applies; there appears to be general concern for ensuring processes support regulatory compliance as based on the work completed for this assessment and past internal audit efforts and results; and, there have been minimal to no federal and state regulatory findings to date. Additionally, NAU has an established risk management function addressing insurable and procurement-related risks and employs full-time compliance specialists for key areas like research, healthcare, and human resources related risks (ADA, Title IX, etc.). However, this culture could benefit from a compliance oversight structure that can help guide activities that have impact across NAU, address compliance practice consistency, and ensure that new, complex regulatory matters receive appropriate attention.

For best practice reference purposes, we contacted NAU's peers to determine how they address compliance oversight. We obtained data from 58 Colleges and Universities identified by ABOR as NAU's peers, which disclosed the following:

NAU Peer Colleges & Universities with Centralized Compliance Functions			
Centralized Compliance	Formal Compliance Function (Individual and/or Department)  Compliance Committee Only		
37	31	6	
64% of All NAU Peers	84% of Compliance Programs	16% of Compliance Programs	

The case for compliance oversight, including completion of robust organization-wide compliance risk assessments and existence of processes for ensuring compliance risk is identified and addressed, is deeply rooted in the U.S. Federal Sentencing Guidelines for Organizations, which establishes the potential for applying "credit" or reduced fines and penalties should an organization be found guilty of a compliance failure. (Source: Deloitte Compliance Risk Assessment whitepaper 2015 – see Exhibit C)

Given NAU's size and complexity, and related compliance activities at its peer institutions, NAU should pursue notable best practices for effective corporate compliance governance. The Society of Corporate Compliance and Ethics (SCCE) identifies a "diligent" compliance program based on seven minimum standards as identified in the above-mentioned Federal Sentencing Guidelines, which are used by federal judges to determine fines when compliance lapses and fraud occur (see Exhibit D):

- 1. Establish standards of conduct as well as policies and procedures supporting a commitment to compliance and ethics.
- 2. Delegate an individual or group with operational responsibility, autonomy, and authority for overseeing entity-wide compliance.
- 3. Create effective, ongoing training methods and open lines of communication.
- 4. Use internal tools and functions to conduct auditing and monitoring of compliance activities to ensure the effectiveness of the compliance program and detect criminal conduct.
- 5. Implement a reporting and investigation mechanism that encourages employees to raise concerns that they know will be pursued, resolved, and when applicable, reported to the federal government.
- 6. Establish appropriate incentives for compliance and disciplinary actions for compliance offenders in line with applicable policy and regulatory requirements.
- 7. Resolve identified problems in a timely manner and add related issues to monitoring activities.

**Observations:** The following observations should be taken into consideration in determining the extent of effort NAU may wish to apply in maturing its compliance oversight posture.

- NAU appears to have a generally compliant culture and, based on discussions with individuals in this process as well as through other audit involvement (e.g., audit and special project work, Enterprise Risk Management interviews, etc.), may emphasize compliance at times over the operational benefit or cost/benefit of the business processes implemented to achieve compliance. A more detailed risk assessment, as noted above, could provide the additional information needed to ensure a proper cost / benefit approach to implementing policy, procedure, and practices that address compliance. In this regard,
  - While NAU is maturing implementation of an Enterprise Risk Management framework, the effort has not yet addressed a formal approach to the application of risk appetite and risk

tolerance in evaluating risk. Making the effort to establish guidance such as NAU risk appetite and related risk tolerances could prove beneficial in ensuring the approach to managing compliance risk is balanced to NAU's mission, vision, and strategy.

- NAU began implementing an administrative service model in March 2020 designed to improve consistency and efficiency in financial, human resources, and research business processes. Improving NAU's understanding of compliance risk and managing those processes relative to risk appetite and risk tolerance guidance, could result in a better application of the shared services model as well as NAU Administrative processes.
- While NAU has reporting mechanisms for addressing specific areas of compliance risk (e.g., Clery Act, Title IX) and has specific individuals and offices tasked with ensuring compliance in certain areas, NAU does not have a centralized, formal reporting structure for compliance. Such a centralized reporting structure could assist NAU to better address potential compliance infractions (thereby avoiding any such infractions resurfacing as whistleblower activities).
- Laws, rules, and regulations do not always clearly articulate what constitutes compliance or how
  to operationalize processes to ensure compliance. Ensuring consistent practices as supported
  by formal codes of conduct, implemented policy and procedure, and executive oversight can help
  deter regulatory action against NAU, even when it may be determined that a given approach
  must be changed.

Like many higher education institutions, NAU has limited resources and must thereby balance its strategic priorities and compliance risks with the compliance program structure it chooses to implement. In this regard, there are various, yet to be determined options, that may prove beneficial for NAU, including but not limited to:

- Establishing an executive working group to further assess the true compliance risk and the nature
  of any formal compliance office or function to be established. Such a group might also research
  available corporate compliance guidance and the specific activities of peer organizations for
  useful practices to help NAU determine its best approach.
- Establishing a formal, multi-disciplinary / cross-functional compliance oversight committee as a
  central oversight body that can help ensure consistency in compliance risk assessment practices,
  address compliance matters that impact all or broad aspects of NAU, and provide guidance for
  complex and new compliance requirements. Such committees typically meet periodically at
  regular intervals to discuss emerging compliance risks and to chart progress ensuring older
  compliance risks remain addressed. Such a committee might also initially serve as the working
  group noted above.
- Formalizing the existing decentralized compliance leadership for some type of periodic reporting either to a committee as noted above or a key executive or leader.
- Continuing under the current structure, given current indications of a strong compliance culture, and pending any future initiatives, issues, etc. that warrant reconsideration for such oversight.

The assessment identified certain individual laws, rules, and regulations for which a compliance approach was not necessarily evident, and we shared those gaps with applicable executives, directors, and managers. None of these potential compliance gaps were deemed to be significant relative to all applicable laws, rules, and regulations.

Since this was not an audit, the typical General Control Standard matrix is excluded from this section of the audit report since individual controls were not being validated. However, the applicable General Control Standard category is "Compliance with Laws and Regulations" whereby the assessment addressed the existence of NAU policy, procedure, practice, or other activities that supported existence of compliance efforts related to a given law, rule, or regulation.

We appreciate the assistance and cooperation provided by the following offices:

- Comptroller
- Enrollment Management / Financial Aid
- Environmental Health & Safety
- Equity & Access
- General Counsel
- Government Affairs
- HIPAA Compliance

- Human Resources
- IT Security
- NCAA Compliance
- Research Compliance
- Risk Management
- Student Affairs

Mark P. Ruppert, CPA, CIA, CISA Chief Audit Executive (928) 523-6438 mark.ruppert@nau.edu

# **EXHIBIT B – Notable STATE Laws, Rules & Regulations Applicable to NAU**

Title (Alpha Order)		
AZ Procurement Code Applicability	Payment of salaries; sick leave	
Abortion at educational facility prohibited; exception	Postsecondary health sciences programs	
Alien in-state student status	Presumptions relating to student status	
Annual appropriation; enrollment audit; expenditure; balance; salaries	Prohibited financial assistance; report	
Appropriations for university research infrastructure facilities; university transfers; annual report	Public Records	
Arizona board of regents; committee on free expression; annual report; committee termination	Public records exemptions; confidential information; historical records; donor records	
Arizona Pollutant Discharge Elimination System Program	Report; academic performance of high school graduates	
Arizona Proposition 107 - Affirmative Action Amendment 2010	Revised Uniform Arbitration Act	
Arizona teachers academy; tuition and fees scholarships; fund; annual report	Revised Uniform Athlete Agents Act: Civil remedies	
Awarding of academic and vocational credits; policies; current and former military members	Revised Uniform Athlete Agents Act: Notice to educational institution	
Biohazardous Medical Waste and Discarded Drugs	Revised Uniform Athlete Agents Act: Required form of contract	
Board of regents and university scholarships; notification requirements	Revised Uniform Athlete Agents Act: Student athlete's right to cancel contract	
Clinical rotations	Rights of students at universities and community colleges	
College course materials; information	Risk Management	
Concurrent enrollment; nonresident tuition	Risk Management: Insurance; Uninsured Losses	
Conflicts of Interest	Rural health professions program	
Contract lobbyist; prohibition	Scholarships and financial aid provisions	
Control of vehicles and nonpedestrian devices on university property; sanctions; compliance w\emissions inspection	Selective service registration; applicability	
Correspondence and extension courses	Special admission of students under age eighteen; enrollment information; reports	
Department of Transportation: Penalties and Violations	State universities; location; faculty powers; report	
Deposits of universities monies to be secured; exception	Student identification cards; suicide prevention; contact information required	
Emergency Planning and Community Right to Know Act	Student organizations; recognition; rights	
Enforcement of contract	Student status guidelines	
Environment Health Program Area: Air	Students' right to speak in a public forum; protests and demonstrations; invited speakers; court actions	
Faculty employment decisions; religious and political beliefs	Suicide prevention training programs; requirements	
Fingerprinting academic and nonacademic personnel; civil immunity	Teacher training schools	
Free expression policy; rules; Arizona board of regents; community college district governing boards; requirements	Transfer articulation; course numbering; reports	
Free speech; prohibition	Transfer of fees for student organizations; prohibition; support	
Gift or loan of credit; subsidies; stock ownership; joint ownership	Transfer of technology developed by universities; intellectual property policies	
Hazardous Waste	Tuition waiver scholarships; persons in foster care; requirements	
Health professions field scholarships; purpose; amount; repayment	Unauthorized Obligations	
Identification numbers; social security numbers	Underground Storage Tanks	
Information on free expression; freshman orientation programs	University infrastructure capital financing; capital infrastructure funds; appropriations; uses; review	
Information on persons who have completed vocational programs	University property of expelled students; classification	
Inspection and audit of contract provisions	University recruitment & retention program for economically disadvantaged, minority and underrepresented student populations	
In-state student status	Use of university resources or employees to influence elections; prohibition; civil penalty	
Medical marijuana; school campuses; prohibition	Voting information; postsecondary students	
Medical programs; students; required opioid-related clinical education	Water Quality Control: Local Water Pretreatment	

### **EXHIBIT C**

In a business environment where reputational threats lurk around every corner, a strong culture of ethics and compliance is the foundation of a robust risk management program. The lessons learned related to scandals and organizational crises that trace back to the early 2000s make one thing clear: without an ethical and compliant culture, organizations will always be at risk. In fact, more and more, culture is moving from a lofty, "squishy" concept to something that should be defined, measured, and improved (see figure 1).

Figure 1: Culture is the foundation

The Deloitte Ethics and Compliance Framework recognizes that an ethical and compliant culture is the core element of an organization's ethics and compliance program. If the culture of the organization does not support principled performance, then all of the people, processes, and technologies that are put in place to mitigate ethics and compliance risks are suboptimized.

The framework needs to be comprehensive, dynamic, and customizable, allowing the organization to identify and assess the categories of compliance risk to which it may be exposed (see figure 2). Some compliance risks are specific to an industry or organization—for example, worker safety regulations for manufacturers or rules governing the behavior of sales representatives in the pharmaceutical industry. Other compliance risks transcend industries or geographies, such as conflicts of interest, harassment, privacy, and document retention.

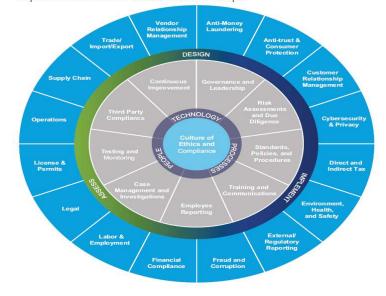

Culture is one of the biggest determinants of how employees behave. Strong cultures have two common elements: there is a high level of agreement about what is valued, and a high level of intensity regarding those values. Of course, not all cultures encourage good or ethical behaviors. When it comes to developing world-class ethics and compliance programs, the starting point is a positive culture of integrity.

"Culture helps people understand what is expected of them and how they need to behave. When the organizational culture embraces integrity, people know that integrity needs to characterize their actions."

Because the array of potential compliance risks facing an organization is typically very complex, any robust assessment should employ both a framework and methodology. The framework lays out the organization's compliance risk landscape and organizes it into risk domains, while the methodology contemplates both objective and subjective ways to assess those risks.

An effective framework may also outline and organize the elements of an effective risk mitigation strategy that can be applied to each compliance risk domain.

**EXHIBIT D** 

# 7 Elements of an Effective Compliance & Ethics Program

These 7 elements are identified in the US Sentencing Guidelines as essential to an effective compliance and ethics program. Use them as a road map to establishing and maintaining compliance and ethics at your organization.

O1 Standards of conduct, policies, and procedures

Put these policies in writing and use them as the foundation for your entire program.

O2 Compliance officer

Delegate an individual or group with operational responsibility, autonomy, and authority.

03 Communication and

Create effective, ongoing training methods and establish open lines of communication.

O4 Internal monitoring and auditing

Use internal tools to evaluate program effectiveness and detect criminal conduct.

O5 Reporting and investigating

Encourage employees to raise concerns and have investigative procedures in place.

O6 Enforcement and discipline

Establish appropriate incentives for compliance and disciplinary actions for violations.

07 Response and prevention

Resolve identified problems promptly and add related issues to monitoring activities.
