ABOUT THIS REPORT

The Arizona Board of Regents Postsecondary Performance Report is an annual report examining the performance of the previous year’s Arizona high school graduates during their first year at Arizona’s public universities. The performance of Arizona high school graduates is detailed in aggregate by first term grade-point average, continuation into the spring semester, enrollment, course level, and grades in English and mathematics courses. Additionally, the demographic composition and percentage of students admitted without an academic deficiency are presented.

ABOR Policy 2-121 specifies 16 core courses required for admission to an Arizona public university. A student’s failure to take these courses in high school prior to enrolling in the university is defined as an academic deficiency. Universities may enroll a student with one deficiency in English or mathematics and two deficiencies in the other required courses.

The ABOR Postsecondary Performance Report is required by Arizona Revised Statute §15-1822. In addition to the comprehensive university summaries included in the report, individual reports for each Arizona high school are provided to the Arizona Department of Education.

ABOUT THE ARIZONA BOARD OF REGENTS

The Arizona Board of Regents is committed to ensuring access for qualified residents of Arizona to undergraduate and graduate institutions; promoting the discovery, application and dissemination of new knowledge; extending the benefits of university activities to Arizona’s citizens outside the university; and maximizing the benefits derived from the state’s investment in education.

EXECUTIVE SUMMARY

Incoming freshmen from Arizona high schools are demonstrating stronger academic progress in preparing for the rigor of university courses.

In fall 2019, 10 percent of Arizona high school graduates enrolled in an Arizona public university with one or more academic deficiencies in core courses. This continues a decline in the number of students admitted to the universities with an academic deficiency and is the lowest number of high school graduates admitted without credit for one or more core high school courses in the past 10 years.

College preparedness is a key indicator of student success at Arizona’s public universities. Students who enter college with credit for 16 required high school core courses typically fare better academically than those who are admitted without completing one or more of these courses. In the fall of 2019, Arizona high school graduates without any academic deficiencies averaged a B or 3.2 overall GPA, while students with academic deficiencies averaged a C+ or 2.6 GPA.
